

Firewall Security Analysis

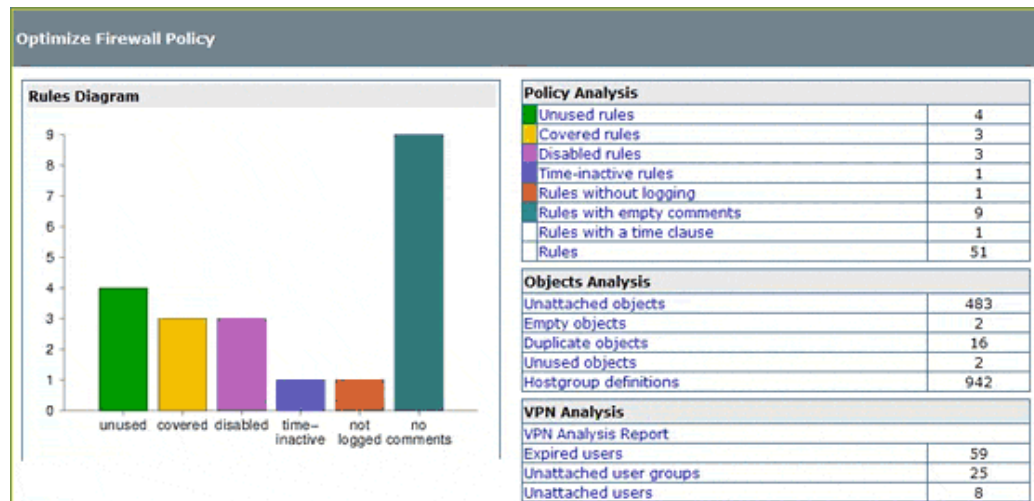

Subscription Service

Network Computing Architects, Inc.

A Yearly Subscription Service for Quarterly Firewall Configuration Reviews

Security Governance and Compliance require that organizations monitor the various layers of enterprise security to ensure that devices are performing as designed. Firewalls are critical to enforcing your organization's overall security policy. Understanding risks associated to your firewall configurations will allow you to appropriately determine next steps in increasing your organization's security posture.

Policy Optimization

Firewalls work more efficiently and are easier to manage when the policies are uncluttered and free of unused rules and objects.

NCA's **Firewall Security Analysis Service** will provide you with the ability to optimize policies in an easy and secure way.

What is the Firewall Security Analysis Service?

NCA's **Firewall Security Analysis Service** is a comprehensive solution that will analyze your firewall configuration files and identify security risks in your firewall policies based on industry best practices and your compliance requirements.

What will you receive?

On a Quarterly basis, you will receive:

- Firewall configuration analysis report including:
 - Executive summary report of highest risk findings
 - Firewall configuration analysis output data (burned CD in HTML format)
- Onsite report review meeting to discuss findings and determine next steps

Los Gatos CA 408-342-9900 | Las Vegas NV 702-457-7990

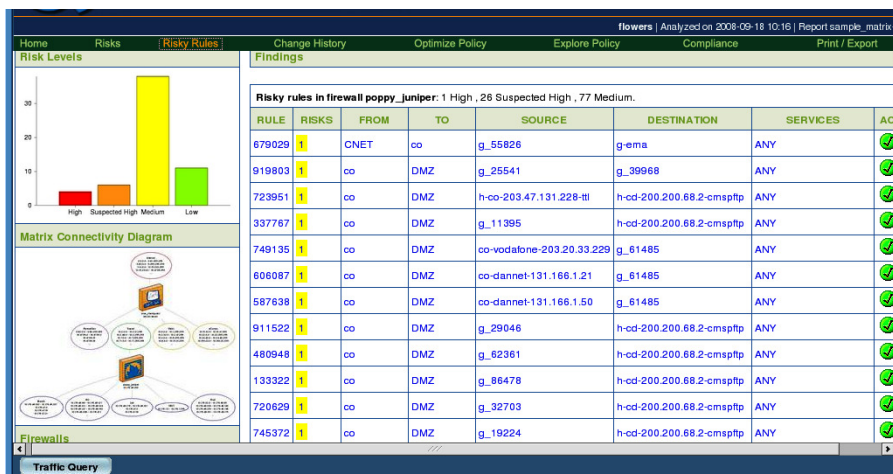

Firewall Security Analysis Subscription Service

Leveraging NCA will provide a comprehensive firewall security analysis service that:

- Reviews and analyzes every potential packet the firewall or router may encounter.
- Pinpoints potential risks on a rule-by-rule basis.
- Will identify duplicated, disabled, unused and expired rules as well as unused objects.
- Understands and translates rules across multiple firewall vendors for easy server IP migration and change management.
- Provides audit reports against regulatory compliance standards including PCI DSS, SOX and ISO 27001:2005.

The **Firewall Security Analysis** Service Supports industry leading firewall manufactures including **Cisco, Checkpoint or Juniper Firewalls as well as your Cisco IOS Access Lists (ACLs).**
